

Aluminum Die Casting,China Aluminum Die Casting

[Aluminum Die Cast](#) Parts produced by Pacific Die Casting, Inc. can be stronger than steel. Kinetic Die Casting Company is a part diecaster of lower priced, better quality aluminum die cast parts, sometimes also known as castings, aluminum part castings, high pressure part die castings, or aluminum diecastings. Kinetic Die Casting has Low Quantity Die Casting Production or High Quantity Die Casting Part Production

High pressure die casting is a process we use to make aluminum die cast parts. We inject molten aluminum alloy metal under pressure into a steel die to produce aluminum parts. Diecasting is a very inexpensive aluminum part manufacturing process

Primarily we produce aluminum alloy die castings, but we also make some diecastings in zinc alloys. Kinetic Die Casting Company's die cast design consultants will assist you with die casting aluminum part design, aluminum die casting prototypes, die cast tooling, machining of die cast parts and finish the surface of many kinds of die cast aluminum parts
